**PSG COLLEGE OF TECHNOLOGY COIMBATOR DEPARTMENT OF COMPUTER APPLICATIONS**

**23MX18 Web Application Development**

**28.08.2026 Worksheet 2 : (To be written in the observation NoteBook)**

**Objective**: To apply the concepts of **Box Model → Display → Positioning** becomes visible in one small application and find an answer for

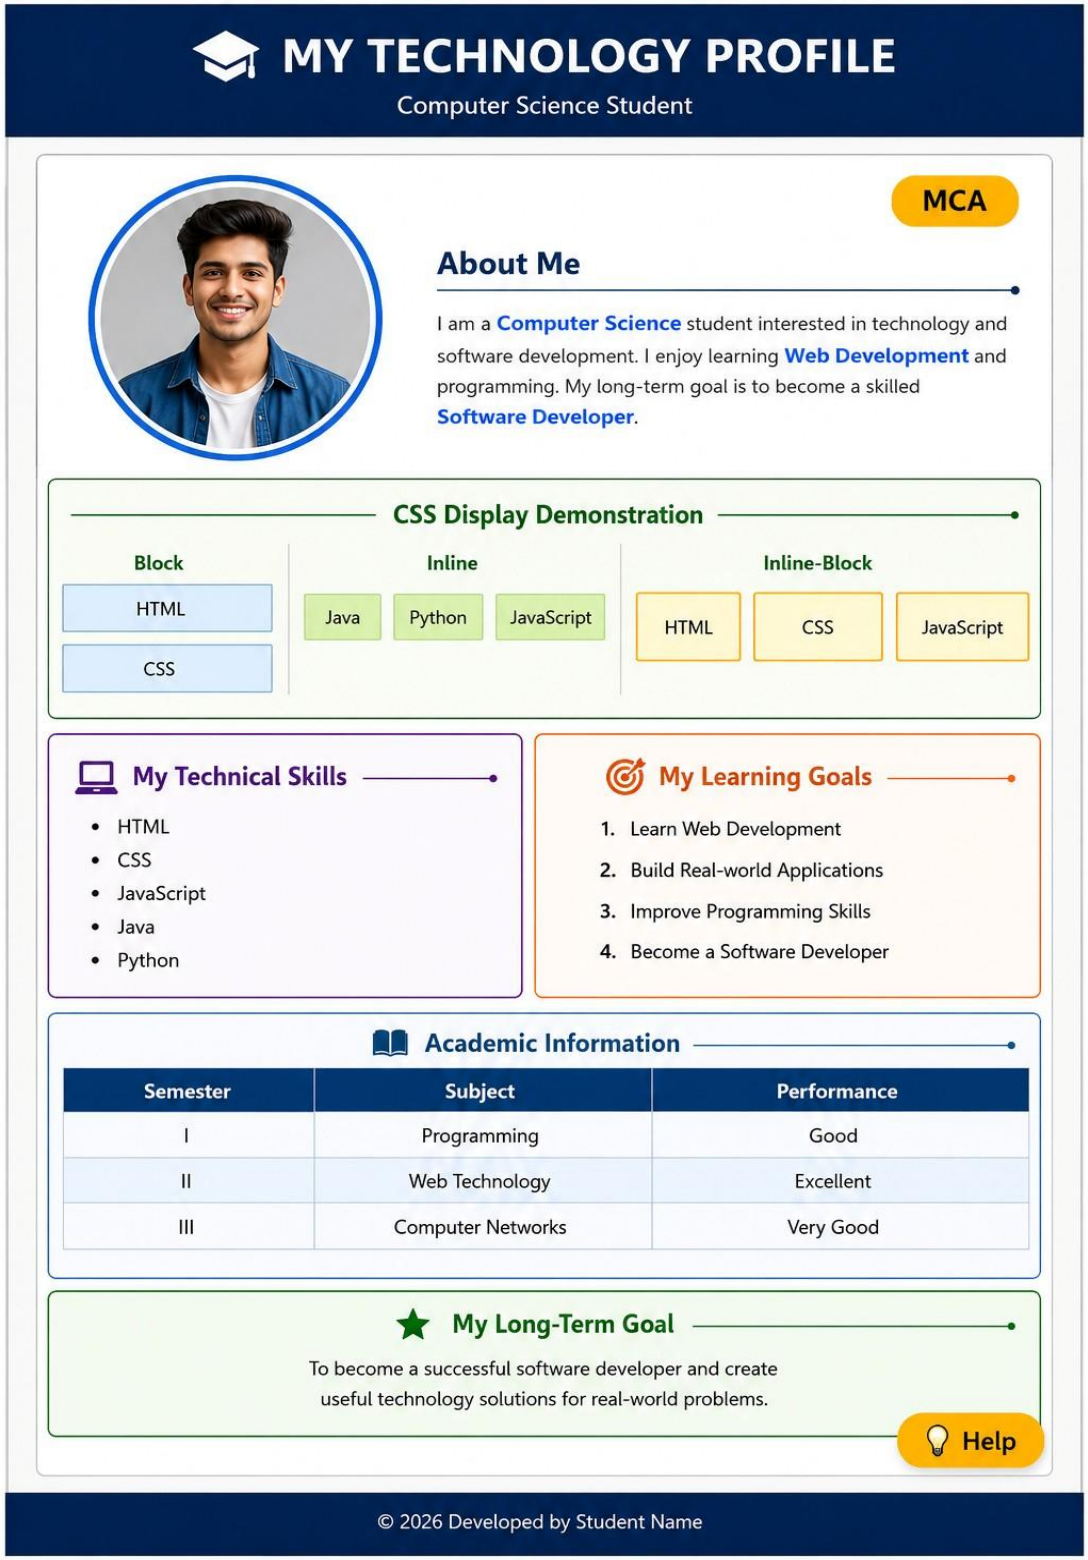

**"How can I use HTML and CSS together to construct a realistic webpage?"**

Create a webpage titled **"My Technology Profile"** for a Computer Science student. The page must contain a profile image, personal information table, skills list, and a short career-goal section.

You are to Use : **HTML structure + CSS Box Model + Display + Positioning** together.

Your code should demonstrate:

- CSS Box Model
- display property ● CSS positioning
- Image formatting
- Table formatting
- Ordered/unordered lists
- span
- position: relative
- position: absolute
- position: sticky
- z-index
- margins, borders and padding

## Requirements

### 1. Page Structure

Use appropriate HTML elements:

<header>
<nav>
<main>
<section> <footer>

**2. Image**

Insert a student/technology-related image. <img

src="student.jpg" alt="Student Profile">

Apply CSS to control:

- width
- height
- border
- border-radius
- margin
- padding

**3. About Me**

Create a paragraph of **at least three sentences**.

Use:   to emphasize important words.

For example, students can emphasize:

Computer Science
Web Development
Artificial Intelligence with

different colors.

**4. Skills List**

Use CSS to demonstrate unordered list with

padding
margin border
background

**5. Learning Goals**

Create an ordered list:

**6. Academic Information Table**

Create a table with at least: 3 columns 4 rows heading row Footer row

**7. Box Model Requirement : Should have used Box model**

**8. display Requirement**

Students must demonstrate **three different display values**.

**A. block**

**B. inline**

**C. inline-block**

**9. Positioning Requirement - Should have used necessary positioning**

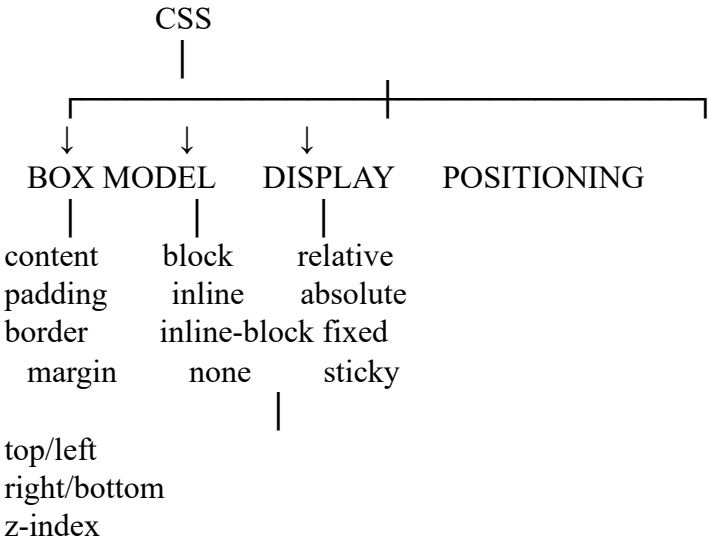

**10. Sticky Header**

Your page should have enough content so that the page can be scrolled and observe that the header remains at the top while scrolling.

**11. Fixed Element**

Add a small "Top" or "Help" button:

This element stays at the same viewport position during scrolling.

## Main.html

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8" />
  <meta name="viewport"
content="width=device-width,
