PSG COLLEGE OF TECHNOLOGY COIMBATOR
DEPARTMENT OF COMPUTER APPLICATIONS

23MX18 Web Application Development Date of Submission: 15.09.2026 1pm

NAME : SANJIVKUMAR A **ROLL NO : 26MX217**

Objective:

- To design and develop a multi-page HTML form using HTML5 form controls, regular expression-based validation, and external CSS without using JavaScript.
- To apply CSS styling, pseudo-classes, tooltips, favicon, and page navigation to create a user-friendly and validated web form.

Exercise: Student Details Form with Common CSS

Develop a **Student Personal Details Form** using **HTML5 and CSS only**. JavaScript must not be used. Create **three files**: index.html , success.html , style.css

The form page should collect the following details:

Field	Validation
Name	Required; alphabets and blank spaces only
Alphanumeric ID	Required; alphabets and numbers only
Phone Number	Required; exactly 10 digits, starting with 6–9
Email ID	Required; specified email pattern
District	Drop-down list containing districts of Tamil Nadu
Village/Town/City	Drop-down list
Postal Code	Required; exactly 6 digits, starting with 6

Form requirements:

1. Use the required attribute for Name, Alphanumeric ID, Phone Number and Postal Code.
2. Use the pattern attribute wherever regular-expression validation is required.
3. Every field must have suitable validation.
4. Use the title attribute to display a tooltip when the mouse hovers over an input field.
5. Use CSS :valid and :invalid pseudo-classes to indicate the validation status.
6. The Submit button should be provided.
7. The Submit button should appear green while it is being clicked.
8. No JavaScript shall be used.

9. On successful validation, the form should open success.html using the action attribute.
10. The second page success.html should display: Details submitted successfully in pleasing colour in the center of the page.
11. Proper field set to be used to make relevant sections of the form.

Common CSS requirements

Create **one external stylesheet named style.css** and link it to **both HTML pages**.

The common stylesheet should contain styles for: Page background, Page heading/title, Form/container, Labels, Input fields, Select boxes , Buttons , Valid and invalid fields, Hover/focus effects, Footer/copyright text

Both pages should have:

1. A meaningful <title> in the <head>.
2. A **favicon** using a small image file such as favicon.png.
3. The same external stylesheet:

<link rel="stylesheet" href="style.css">

4. A common header containing the application/site name.
5. A common footer containing:

   © 2026 Student Registration System. All Rights Reserved.

6. The favicon and CSS should be referenced using **relative paths**.

Create the folder structure as mentioned below:

<rollNumber>Registration/

```
│
├──<rollNumber> index.html
├── <rollNumber>success.html
├── <rollNumber>style.css
└── favicon.png
```

<rollNumber> means respective student rollnumber.

Do not use JavaScript anywhere in this exercise.
